

Call for Papers

Areas to be covered

1. Conceptual aerodynamic design
2. Wind tunnel testing, including model design and rapid prototyping
3. Wind tunnel instrumentation and balance design
4. Applied CFD
5. Missile and launch vehicle aerodynamics
6. Manned and unmanned aircraft
7. Aerostats and Airships
8. Mini & Micro UAVs
9. Applied flight mechanics and controls
10. Aerothermal design, analysis and testing
11. Aeroelasticity and fluid structure interaction
12. Aerodynamic databases and portals
13. Multi-disciplinary design optimization
14. Wind energy and wind turbines

Instructions

Extended abstracts of technical papers for presentation at SAROD-2011 are solicited in the above-mentioned areas. The abstract should have the complete information, which includes the title, author's affiliation, contact details, etc. The abstract should be minimum of 2 pages, in MS-Word format and emailed to the following address:

sarod2011.review@gmail.com

Submitted abstracts will be peer reviewed and authors of selected abstracts would be requested to submit the full length paper. The papers selected would be published in the symposium proceedings.
